A healthier
home & family

Easy and fast
to vacuum

Powerful but
whisper quiet

Improve your family's health and reduce allergens by 52%

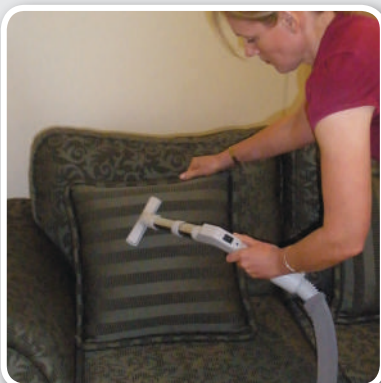

A Kiwivac can reduce allergens in the home by 52%, giving anyone in your family who suffers from allergies, asthma or eczema, freedom from the leading causes of these conditions. Scientific research proves that a professionally installed central vacuum system will reduce the leading triggers of:

- Asthma
- Breathing conditions
- Allergies
- Skin conditions

A Kiwivac does not exhaust any air, dust or particles back into the room being cleaned. Your power unit is installed in the garage or under the house, removing 100% of vacuumed dust and dirt from your home!

INVEST IN YOUR HOME AND FAMILY

A well-designed and professionally installed central vacuum system will add significant value to your home, your family's wellbeing, your lifestyle and to your pocket.

“ I love it – it's the best vacuum cleaner I have ever had. It has plenty of suction and you can feel the carpets are clean after vacuuming. I wouldn't go back to a portable ever again. It's so quiet you can even hear the phone ringing. Our son's asthma has improved since we put a Kiwivac in our existing home. ”

Carolyn
Karaka, Auckland.

www.kiwivac.co.nz

Easy to use and clean to empty

Make vacuuming your stairs a breeze, with no portable vacuum to lug up and down. You won't get a face full of dust when emptying your Kiwivac as we offer the two most hygienic and user-friendly emptying methods available. Choose from either our patented AVT Slide Plate System as a bagless option, or opt for our Micro Filter Disposable Bag System.

Less damage to your walls and furnishings

No more dragging the portable vacuum behind you with the risk of it heading off in any direction and banging into your walls or furnishings.

Save money

A Kiwivac system is more affordable than you would expect and will save you money long-term. It's worth considering when you think about how many portable vacuum cleaners you'll buy over the years and at what cost.

Save time

Less time is spent vacuuming because the suction is much more powerful than that of the average portable vacuum cleaner. You'll only need to empty your Kiwivac or change the bag a couple of times a year.

Extend the life of your floor coverings and furnishings

Because the motor of a Kiwivac is installed in a fixed spot in your house, it can be much bigger and more powerful. Your carpets, floor coverings and furnishings will last longer with a deeper clean. Typically, your floor coverings are one of the most expensive items in your home so be sure to protect your investment.

Why choose us?

We understand New Zealand homes and will provide you with a solution to perfectly suit your lifestyle.

Kiwivac has been providing New Zealanders with top quality central vacuum systems perfectly suited to their homes and lifestyles since 1983 - that's over 30 years. We understand New Zealand homes and our team hold a tremendous amount of expertise about all aspects of central vacuums, homeowners' requirements, cleaning dynamics and product engineering.

Our New Zealand-wide network have installed over 13,000 systems and are trained to:

- Design your system to perform at its best at all times
- Design your system to be user-friendly
- Consult with you on the best design, hose length and tools for your needs
- Carry out the installation to the highest standards
- Ensure your installation is Building Code compliant

We believe in providing our customers with a quality product and accessories and are **committed to reliable and friendly customer service**. This means you can trust us with your central vacuum system and know we will do everything to create an enjoyable experience for you.

REDUCE
REUSE
RECYCLE

MAKING A DIFFERENCE

- Kiwivac is built to last a lifetime
- Where possible, materials used in our manufacturing process are recycled
- We use environmentally-friendly bags
- Kiwivac ATV power units are serviceable and able to be recycled

New Zealand made

The Kiwivac AVT range of systems is uniquely tailored to the New Zealand environment, combining Kiwi ingenuity with maximum New Zealand content. Your Kiwivac AVT expert is your one-stop-shop for:

- ✓ Advice on the best system for your needs
- ✓ Service of any brand of central vacuum system
- ✓ Clearing blockages and repairing pipe networks
- ✓ Supply and installation of parts and accessories
- ✓ Repairs of hoses and tools
- ✓ Leak testing of central vacuum systems

“ We have had our Kiwivac system for about 10 years now and I just love it, it's brilliant. I much prefer vacuuming with it to the portable we have at our other house, it is so much easier and quicker. ”

Clare
Karaka, Auckland.

We can install a Kiwivac either in your existing home or as you build a new house

Whether your project is a new home, a renovation or an existing home, chances are it will be possible for our team to install a Kiwivac.

A NEW HOME?

Kiwivac central vacuum systems can be installed in all types of modern design and construction including:

- ☒ Timber
- ☒ Steel
- ☒ Masonry
- ☒ Architectural

Every day, our team are visiting new construction jobs from less than 100m² to 1500m² and designing the pipe network for the home. No job is too small or too big for a Kiwivac and every home and family can benefit from having one installed.

A RENOVATION?

During renovations is an ideal time for our installation team to design and install the pipe network. Your renovation project may be:

- ☒ A villa
- ☒ Art deco
- ☒ An extensive architectural rebuild
- ☒ A bungalow
- ☒ Concrete

We will be able to work out a way to install a Kiwivac into your transformed home – we love a challenge!

AN EXISTING HOME?

Almost any existing home in New Zealand can have a Kiwivac installed, whether your home is built in:

- ☒ Brick
- ☒ Weatherboard
- ☒ Masonry
- ☒ Plaster

At Kiwivac, we pride ourselves on our 'can do' attitude. With clever design and a good understanding of construction, we can design and install a system for your existing home so you too can enjoy all the benefits of a Kiwivac central vacuum system.

Most systems are installed in 1 day

Our installers are highly-skilled and professional and will install your Kiwivac system cleanly, quickly and discreetly so as to ensure as little disruption to you as possible.

Make life easier and protect your floor coverings with our top quality tools and accessories

Typically, your floor coverings are one of the most expensive items in your home. Carpet, tiles, timber, polished concrete, these are a huge investment. We will help you to select the best tools to:

Add years of life to your floor coverings

Make your cleaning job easier

Give your furnishings a more thorough clean

Standard Tool Set

Every Kiwivac AVT system comes with our superior Standard Tool Set, made from the best quality materials.

Crushproof 360° Swivel Hose: 360° swivel at the handle end ensures no twisting or kinking of the hose.

Crevice Tool: For easier cleaning of carpet edges, skirting boards, stairs, car interiors and other hard to reach places.

Two Piece Upholstery Tool: Takes care of your furniture and curtains.

Soft Dusting Brush: Save time on dusting and vacuuming your window sills, ceiling corners, ornaments, and dash boards.

Dual Use Carpet and Hardfloor Tool: Switches easily from carpets to hard floors.

Adjustable Height Wand: For a more comfortable vacuuming experience. Shorten when vacuuming up stairs for extra ease.

Hose and Tool Caddy: Wall-mounted in a convenient place to neatly hang your hose and up to seven tools on.

We stock the largest range of tools and accessories in New Zealand.

See our website or accessories brochure for our full range of tools.

Wheel Brush: Ideal for tiled, timber or vinyl floors. Won't scratch or mark. Perfect for pet hair.

Hose and Tool Caddy: Wall-mounted in a convenient place to neatly hang your hose and up to seven tools on.

The latest technology – hygienic and user-friendly

We only manufacture central vacuum units which require minimum handling of dust, dirt and allergen-causing agents collected in your power unit.

Our research and years of experience has led us to develop two of the most hygienic and user-friendly emptying methods available – choose from either the patented AVT Slide Plate Series or our Micro Filter Sealed Bag System.

You won't get a face full of dust or your hands dirty when emptying our power units!

AVT Slide Plate Series – the cleanest way to empty your bagless system

Our patented Slide Plate cyclonic power units feature the most hygienic emptying system in the world. The power unit is directly and cleanly emptied into a household rubbish bag by withdrawing the slide plate from its base. Close the slide plate and you are done. The unit only needs to be emptied a couple of times a year.

It takes just 3 easy steps to empty:

STEP 1

Attach rubbish bag

STEP 2

Pull slide plate out

STEP 3

Push slide plate back in

To make our Slide Plate system truly maintenance-free, we searched the world for the best filter made. Our TEFLON lined self-cleaning filter ensures our power units are maintenance-free, making your job as easy and fast as possible.

Power Unit Specifications

Motor Performance	No. of Inlets	House Size	Airwatts	Waterlift	Dust Capacity	Dimensions H x W
MODEL AVT1	up to 6	up to 250m ²	461aw	2836mm	25L	1025 x 320mm
MODEL AVT2	4 - 10	200 - 450m ²	474aw	3482mm	25L	1025 x 435mm

We have a range of inlets to suit your décor

Kiwivac has the largest range of inlets available including our own custom designed inlets. Whether you want a compact inlet or a colour-matched inlet, we have the range to suit your décor with a broad variety of colours and styles available.

MODEL AVT1

MODELS AVT2-AVT3

MODEL AVT4T

Micro Filter Sealed Bag System – a virtually maintenance-free bagged option

Our disposable bag range virtually eliminates all contact with dirt and dust. The double-layered micro filter lined bags last most households 4 - 6 months, and in some cases, over 12 - 18 months.

By tumbling the dust in the bag, rather than using a cyclonic action, there is minimal suction loss until the bag is completely full. When it is full, simply remove and insert a new bag. It takes just seconds.

Each time you do this, you've just changed the primary filter in the triple filtration system – making our premier series power units virtually maintenance-free.

Power Unit Specifications

Motor Performance	No. of Inlets	House Size	Airwatts	Waterlift	Dust Capacity	Dimensions H x W
MODEL KB1	up to 6	up to 250m ²	461aw	2836mm	19L	800 x 320mm

Made a mess? VacPan – for super-fast cleaning of all hard surface floors

A VacPan is ideal for areas you sweep frequently. Simply sweep the mess to your VacPan, gently flick the switch and it's gone! It's that easy! A VacPan is usually installed in the toe kick of your kitchen, laundry or workshop units.

STEP 1

SWEEP

STEP 2

SWITCH ON

STEP 3

GONE!

“Your follow-up service in helping to find the right attachments for the different floor surfaces was spot on. The cleaning is now a breeze and we would have no hesitation in recommending you and your product.”

John and Louisa
Warkworth.

Satisfaction	90 day money-back guarantee
Power Units	5 year full parts and labour
Inlets	5 year replacement
Tool Sets	1 year replacement
Pipe Network	Limited lifetime guarantee (when installed by an authorised Kiwivac AVT installer)

“ I am absolutely thrilled with my Kiwivac System. It is the most powerful vacuum I have ever used (I have had various central vac systems over the past 30 years). I love all the tools you get with the system, and the socks are perfect on our wooden floor. Your installer is a very nice guy, who was eager to please, and did a great job. Thanks very much for a great all-round central vac system. **”**
